CRITICAL INFRASTRUCTURE MODULES

Flexible Data Center Solutions

EnviroGen Energy Modules and Critical Infrastructure Modules can be deployed anywhere:
Rooftops, raised platforms, external buildings, indoors

PERMANENT SOLUTIONS
RAPID DEPLOYMENT

NEED A FAST SOLUTION?

Our Critical Infrastructure Modules can be deployed in as little as 60 days.

Our modular process allows for a 40% reduction in deployment time versus traditional building.

Standard or Custom Configuration - No Vendor Lock-In

Critical Infrastructure Modules are an integrated, all-in-one solution.

Redefining modular from the inside out.

NEED A MOBILE SOLUTION?

Our mobile solutions can be used to provide emergency power and communication. These can be purchased for your own use or rented to clients as whenever they need generation.

Features:

1 MW, 750kVA UPS, HVAC, 24 hours of fuel, standard interconnect, telecommunications, networking, all-in-one or dedicated

We can also build permanent backup generation solutions.

High Value Solutions

Critical Infrastructure Modules and EnviroGen are great investments that can provide up to 40% and 20% energy cost savings respectively. Our products are all scalable from 100kW to 10MW and beyond. Critical Infrastructure Modules can scale from one backup generator to an entire data center. Compute, storage, telecom, or UPS, the choice is yours.

Highest Certifications Available for:

Efficiency, Structural, Mechanical, Thermal, Seismic, Redundancy, Ballistic, EMP
